OSHA*trac* ®

# Easy, Affordable, Web-based OSHA Injury Tracking

OSHAtrac is a secure, web-based database application which enables employers to create accident reports, track injuries, print required OSHA documents, and view injury metrics in real-time. OSHAtrac is affordable for the smallest of businesses, yet scalable to meet the demands of franchises and large corporations while allowing nearly an infinite number of users and sites. OSHAtrac is easy to use and does not require any special training to navigate. The OSHAtrac database will assist you in staying compliant with OSHA, and make you look like a hero with little effort.

While insurance costs continue to skyrocket at double-digit increases each year, our goal is to provide you with an efficient tool that can decrease your costs associated with occupational injuries, while improving the health and well being of your employees. The federal OSHA law requires most employers with 10 or more full-time employees to keep an annual log of all work-related injuries and illnesses.

OSHAtrac was designed by a Certified Occupational Health Nurse Specialist (COHN-S), who realized the need for an affordable, simplistic, and intuitive OSHA record keeping tool to decrease the complexity of OSHA record keeping. OSHAtrac is a well funded company, which has given us the opportunity to hire the best and brightest software developers, engineers, and IT professionals to develop the OSHAtrac reporting tool.

How does OSHAtrac work?

OSHAtrac is a fully hosted online, injury tracking database. Employers will receive login information and enter data into an Accident Report template. From the data entered into the template, OSHAtrac will translate the data into required OSHA forms, create analytical reports and display your metrics in colorful pie graphs.

> Become OSHA compliant without becoming an OSHA expert. Online accident reporting saves time, reduces costs, reduces injuries, and reduces the risk of non-compliance.

OSHAtrac Benefits

- Simple and intuitive
- Saves time
- Easy to use
- Secure and affordable
- Fully online, no more software installs
- Reduces costs and improves injury outcomes
- Provides metrics, colorful graphs, and reports
- Reduces risk of OSHA non-compliance
- No training required
- Eco-Friendly by eliminating paper

OSHAtrac

Benefits of OSHAtrac

OSHAtrac is a valuable tool that will save your company money, time and improve overall efficiency. Your company will have sophisticated metrics and injury analysis at your fingertips, in real time, which will enable you to identify safety deficits, set company safety goals and to illustrate findings in company presentations. OSHAtrac guides you through the complexities of Occupational Health & Safety and assists your company to stay in compliance with OSHA and federal regulations. If OSHAtrac helps you prevent just one accident, then it pays for itself five-fold. This figure does not include the time and other associated costs saved by using OSHAtrac as your accident reporting tool.

Features	Benefits
Create accident reports online	100% web-based with easy to fill out forms with intelligence built in to reduce reporting errors.
Secure	Encrypted with SSL security and user password protected.
Print pre-packaged reports	At the click of a button, select reports for easy printing and filing. Keep all records online for simple, immediate access anytime.
Metrics and graphical reporting	Access pre-packaged metrics and graphical reporting to proactively reduce accidents and improve outcomes for better employee health and reduced costs. Metrics are a significant benefit of online recordkeeping versus using paper filing.
Administration and user logins	Administrators can manage several different building or franchise locations. OSHAtrac can sort by site and sum of all sites.
Simple user interface	No need for training or to become an OSHA expert and no software downloads requiring IT support.

Report Types:
- Accident Report
- OSHA 300 Log
- OSHA 300A Summary
- OSHA 301
- First Report of Injury
- Injury Metrics
- Injury Severity Rate
- Incident Rate
- Direct Costs
- Indirect Costs
- Professional Notes
